YardLink

Everything your site needs, from people and tech you can rely on.

One platform. 1,000+ suppliers. One team.

Equipment

Site Welfare

Waste Management

Fuel & Materials

hire@yardlink.com · 0330 808 8897 · yardlink.com

Over 16,500 hours each year.

That's what procurement admin could cost you.

Time lost sourcing suppliers, dealing with faulty kit, chasing failed deliveries and collections, and reconciling invoices.

You might not see this cost. It's buried in error margins. But it's real.

We can fix that.

Trusted on 19,000+ projects across the nation.

And the live events the nation turns out for.

THE SECTORS WE SUPPORT

From groundworks to grandstands.

Construction, civils and infrastructure

- Groundworks
- Housebuilders
- Main contractors
- Civil engineering
- Agricultural construction
- Demolition
- Water treatment
- Renewable energy
- Structural steelwork
- Geotechnical surveying

Specialist trades, fit-out and facilities

- Fire safety
- Roofing & cladding
- Heating & ventilation
- Dry lining & plastering
- Electrical & power installation
- Flooring
- Pest control
- Facilities management
- Commercial IT fit-out
- Commercial strip-out & fit-out

Live events

- Festivals
- Sport & stadiums
- Outdoor public events
- Exhibitions & conferences
- Film & TV
- Concerts & tours
- Temporary event builds
- Brand events & pop-ups

95%

of products we help source are delivered within 15 miles of our customers' projects.

That's 75% closer than the construction industry average of 60 miles.

Over 2,400 depots nationwide.

One point of contact.

Every order sorted.

No more chasing multiple suppliers for quotes, updates or deliveries.

We handle the sourcing, so that time and money comes back to your site.

Real people, on hand for every order.

Account manager	A single point of contact, there to help whenever you need it.
Operations team	Keeps every delivery and collection on track, so you don't have to.
Supply chain team	Vets and rates every supplier, so only the best reach your site.
Finance team	Resolves invoice queries, so they don't land on your desk.

We used to manage multiple suppliers. Now it's just one contact who knows our business inside out. The time we've gained has improved our profit margins. The impact is profound.

Mike Robinson
Procurement Controller

Stop ringing round suppliers.
Get everything your site needs through YardLink.

SITE WELFARE

Your site welfare, set up and ready from day one.

Site accommodation

Offices, canteens and welfare units, ready on arrival.

Hygiene facilities

Toilets, showers and drying rooms, sized to your team.

Site security

Secure storage and fencing that keep your team and kit safe.

EQUIPMENT

The right kit, on site when you need it.

Plant & machinery

Dumpers, excavators, telehandlers and forklifts.

Powered access

From boom lifts & scissor lifts to IPAF training for your team.

Tool & access

From drilling & breaking tools to scaffold towers and ladders.

Lighting & power

From tower lights to generators, ready to keep your site running.

FUEL & MATERIALS

Refuelled and restocked, in as little as 24 hours.

Fuel supply

From fuel bowsers to gas bottles and cylinders.

Fuel storage

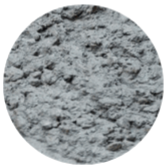

Cage storage and smart tanks that track fuel use and levels.

Materials

From loose aggregates to ready-mixed concrete.

WASTE DISPOSAL

Keep your site clear and your job moving.

Skips & caged lorries

Skips of every size, including roll-on roll-off, plus caged lorries and wait & load services.

Muckaway vehicles

Grab lorries, tipper trucks and road sweepers to clear excavated soil and rubble.

Tank empties

Vacuum tankers keep welfare units & septic tanks emptied and usable.

Compliant disposal

Safe, compliant removal of asbestos and other hazardous waste.

Fast turnaround

Skip exchanges & collections, as soon as next day.

98%

of the waste we clear is diverted from landfill.

Nothing goes unaccounted for.

Each collection is logged with its weight, location and waste code.

Sustainability figures, ready for tenders.

See how much of your waste was recycled, turned into energy, incinerated or sent to landfill, on every project.

Compliance covered.

Every waste supplier is vetted by our supply chain team. Waste transfer notes are kept with every order, proving your duty of care.

1,000+ suppliers, working to win your order.

More than a marketplace. A managed network.

Our supply chain team manages every supplier relationship, so you get the confidence without the legwork.

Fewer failed deliveries. Less chasing.

You place the order. Here's how we pick who delivers it.

1

Only vetted suppliers

Every supplier passes our 12-step compliance process.

2

Every job is scored ★★★★★

We rate every delivery, collection, exchange and wait & load.

3

The best get your order

The highest-rated supplier near your site gets the job.

4

The rest miss out

Low scores mean fewer jobs.

✓

That's how we keep 99% of deliveries and collections on time, in full.

A cheap daily rate isn't the true cost of hire.

ON THE QUOTE

Daily hire rate

NOT ON THE QUOTE

Kit arriving late

Equipment breakdowns

Hours of admin

The real cost was never visible. Until now.

Competitive on price.
Without the hidden costs.

We use the buying power of more than 1,000 suppliers, so you pay no more than going direct. Then we fix what isn't on the quote.

WHAT WE FIX

99% **of deliveries and collections on time, in full.**
Fixes: kit arriving late

65% **less downtime, on average.**
Fixes: equipment breakdowns

<1.5% **of invoices queried.**
Fixes: hours of admin

So the price on our quote is the true cost of hire.

CASE STUDY: BARRON MCCANN

Zero failures. 50 machines a month.

How Barron McCann trusts YardLink to deliver where it matters most.

The problem.

Barron McCann needed powered access equipment on site, on time, every single night, across a major UK supermarket rollout, with zero room for error.

The solution.

YardLink took on the entire supply chain, sourcing and co-ordinating every delivery so Barron McCann's team could focus on the job, not the logistics.

The result.

A 100% success rate on deliveries and collections since 2025 and daily admin significantly reduced.

From Cornwall to Scotland, across hundreds of sites, not a single delivery failed.

People think it's just a lift. Deliver it, pick it up, how hard can it be? But there's so much more behind it. If the quality, timing or management isn't right, it has a huge impact on the job, and ultimately on our reputation with the customer.

Amy Dowd

Operations Lead Coordinator, Infrastructure
Barron McCann

~~Ringing round suppliers~~

~~Chasing deliveries and off-hires~~

~~Paperwork in five different places~~

~~Invoices you didn't see coming~~

~~Spreadsheets for everything~~

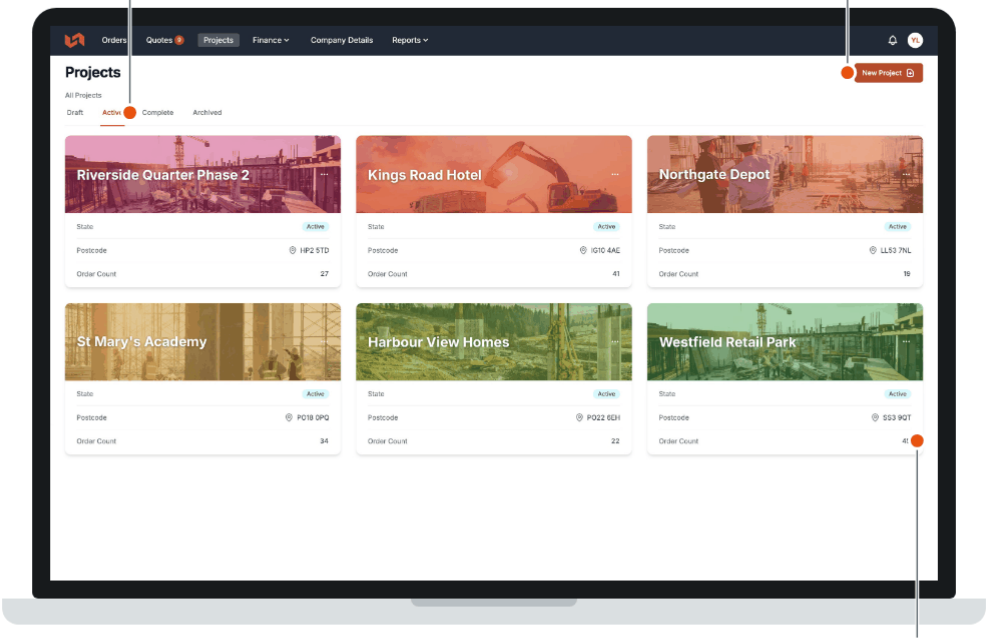

The YardLink Platform.

Every order.
From every supplier.
In one place.

Know where every project stands, at a glance.

Filter by stage
Draft, active, complete or archived.

A workspace for every site
Add a project whenever you win a tender.

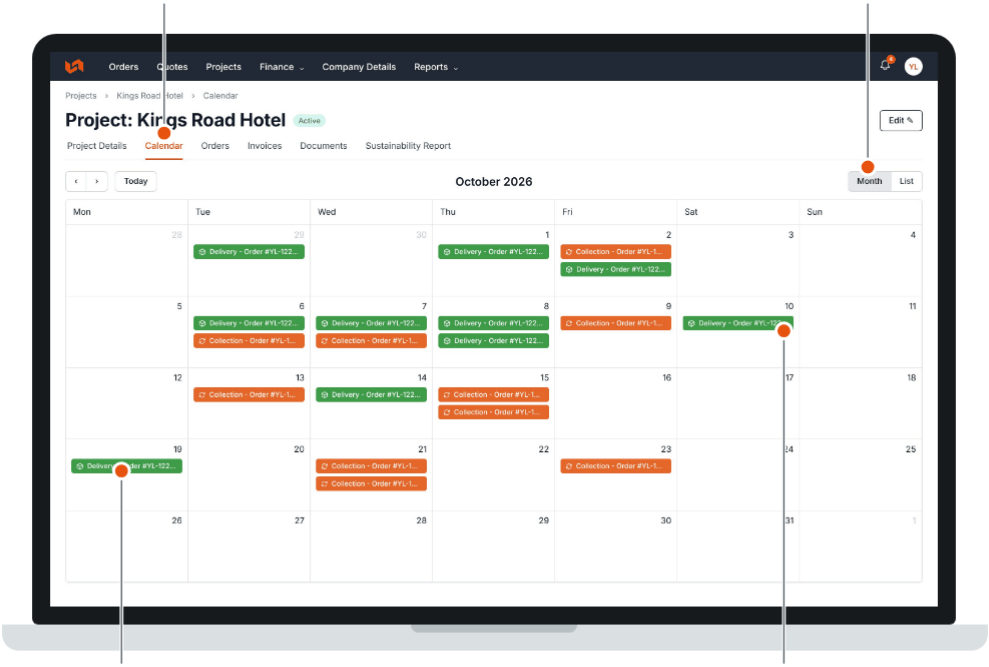

Live order count
See activity across every project.

Know what's arriving on site, and when.

Built into every project
Alongside orders, invoices and documents.

Month or list view
Plan the way your site works.

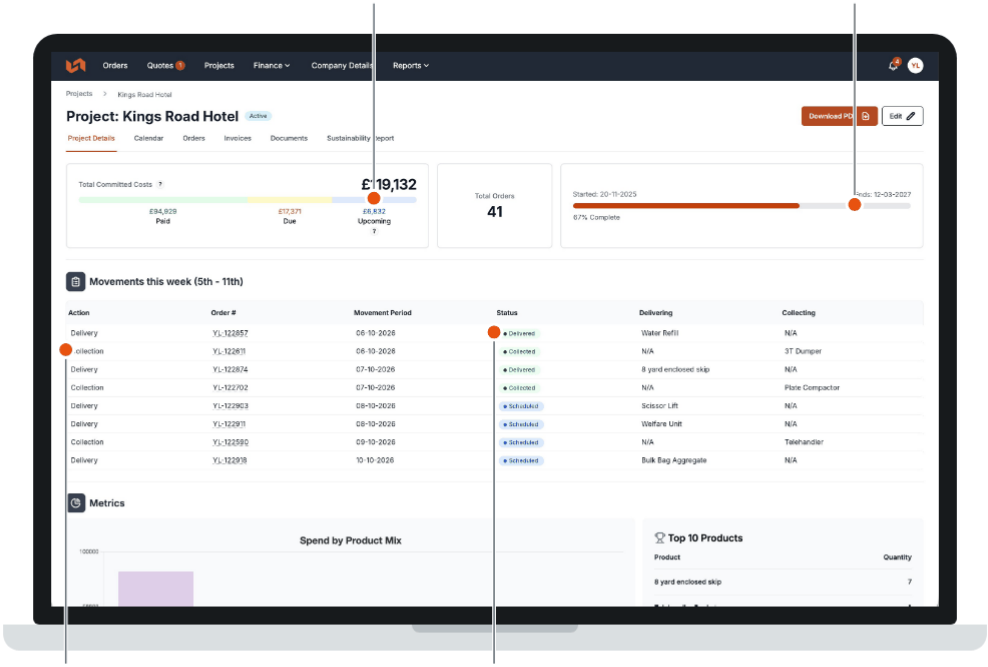

Deliveries and collections
Colour-coded at a glance.

Equipment and waste movements
Hires and exchanges, all in one view.

No more surprise invoices, with every cost seen upfront.

Upcoming costs
Visible before the invoice lands.

Project timeline
Start, end and progress in one view.

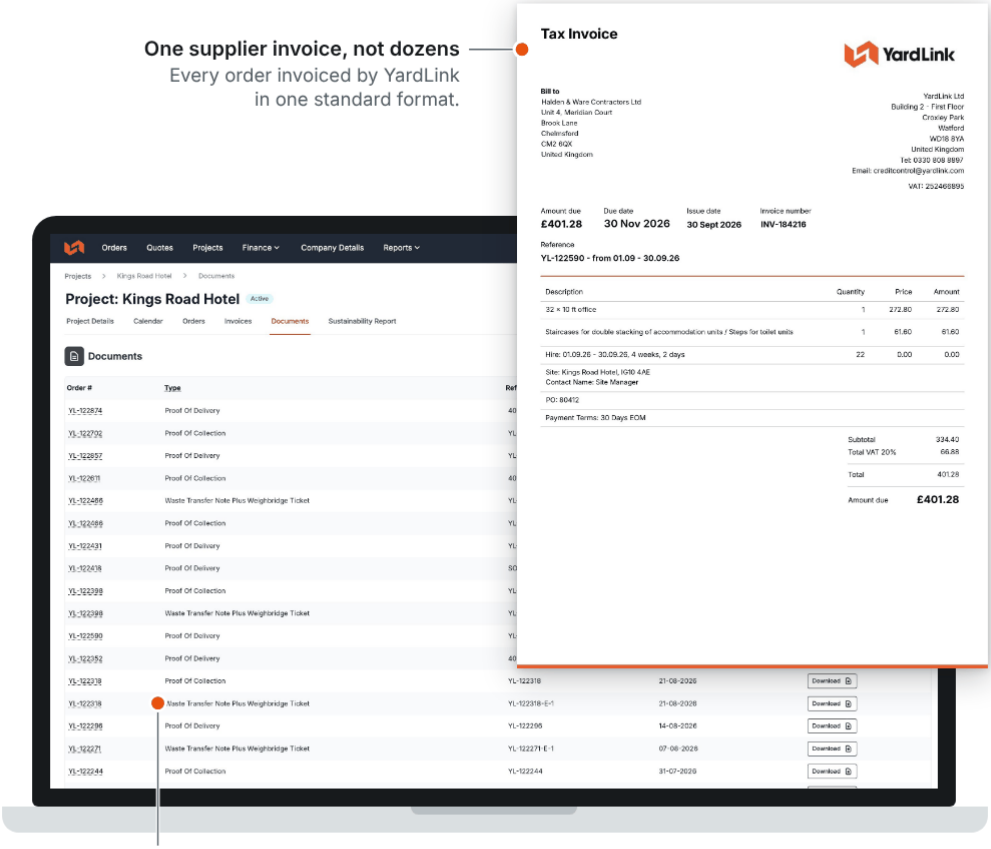

Off-hire in one click
Any piece of equipment, from any supplier.

Equipment movements, tracked live
Delivered, collected or scheduled.

Every document, ready when you need it.

One supplier invoice, not dozens
Every order invoiced by YardLink in one standard format.

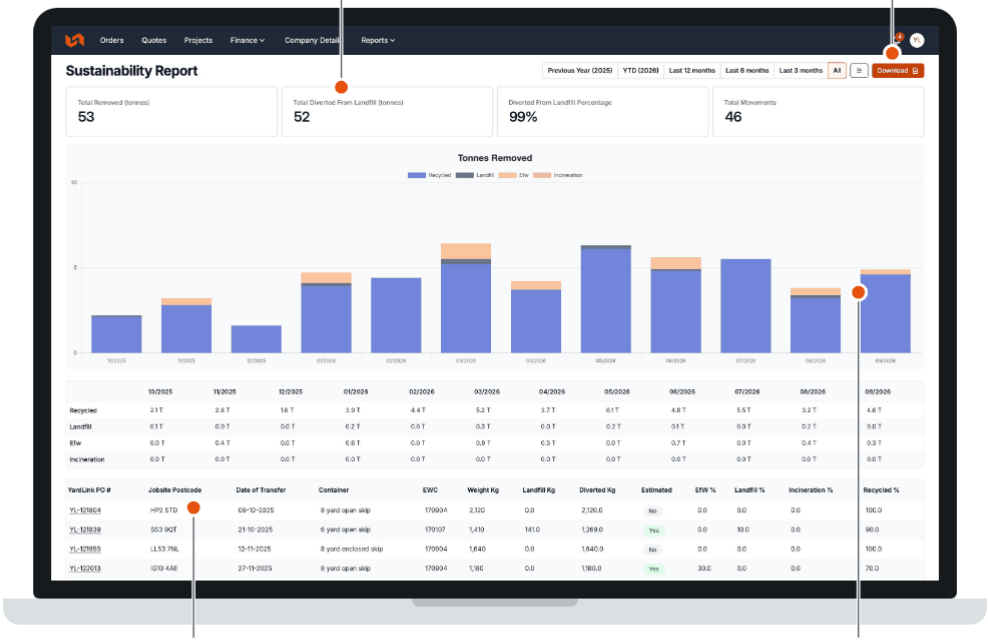

Proof of delivery and collection, and waste transfer notes
Stored against every order.

Hit your sustainability targets, and prove it.

Diverted from landfill
Calculated for you.

Download the report
Ready for tenders and ESG reporting.

Every waste transfer logged
Postcode, weight and EWC code.

Tonnes removed, by month
Recycled, landfill and EfW.

CASE STUDY: SSG CONTRACTS

From guesswork to full visibility.

How SSG Contracts got real-time financial control across 30 active projects.

The problem.

SSG Contracts was tracking hire costs by hand in a messy spreadsheet, across a dozen suppliers, with no real visibility on true project spend.

The solution.

YardLink brought every supplier, every order and every cost onto one platform, live and accurate, across all 30 active projects.

The result.

Committed costs that used to take them the best part of a week to get directly from suppliers are now visible the moment they're committed.

Across 30 active projects, every cost is visible the moment it's committed.

“

If I need to off-hire something, I can schedule it through the dashboard at the click of a button. That is a massive time save that compounds with every job.
